Technical Skills

Languages: Python, SQL, Java, C++, Bash, JavaScript, HTML/CSS

ML/AI: TensorFlow, PyTorch, OpenCV, Hugging Face Transformers, Scikit-learn, NLTK, GANs, Mediapipe

Developer Tools: Git, Docker, VS Code, Ubuntu, GCP, Firebase, Postman, Jupyter Notebook, Colab

Frameworks & Tools: Flask, Django, FastAPI, Streamlit, CodeIgniter, LangChain, Ollama, ChromaDB

Others: Linux, Agile, MySQL, MEL Scripting, SEO, Excel

Education

Concordia University

Sep 2023 – May 2025

Master of Applied Computer Science - GPA: 3.49/4.3

Montreal, Quebec

SRM Institute of Science and Technology

Jun 2019 – May 2023

Bachelor of Technology in Computer Science - GPA: 4.01/4.3

Chennai, India

Experience

Asterbyte Software Systems

Dec 2020 – May 2023

Machine Learning Engineer - Part Time

Kerala, India

- Accomplished emotion transfer in video content through Neural Emotion Director, resulting in realistic facial expressions while preserving original audio.
- Improved personality trait detection by fine-tuning Hugging Face T5 model on audio datasets, boosting classification accuracy by 15%.
- Reduced dataset preparation time by 60% through automated facial image generation using MEL scripting in Maya.
- Enabled real-time music note prediction by deploying a classification model on GCP, reducing latency by 30% and enabling 24/7 inference in production.
- Generated over 10 AI-based album cover samples using GANs trained on song lyrics; fewer than 30% met visual relevance expectations, highlighting the need for model fine-tuning and improved data conditioning.
- Streamlined document processing by scripting an automated parser using python-docx and AJAX, reducing manual QA entry time by 70%.
- Accelerated backend data workflows by optimizing API and data handling logic on an E-learning platform, reducing load times by 25% and enhancing user experience.

Projects

EcogenAI - Aircraft Predictive Maintenance | Python, OpenCV, LLM, Generative AI(GANs)

Mar 2025

- Enabled early fault detection in aircraft by combining OpenCV and GANs, enhancing fuselage and engine safety monitoring.
- Built an LLM-driven chatbot interface with 95% query response relevance, enabling faster and more intuitive access to predictive maintenance logs.
- Presented the system to Bombardier and TCS, leading to top 5 finalist placement among 60+ hackathon teams.

TrainERAI - Live Gym Tracker | Python, Mediapipe, OpenCV, Firebase

Nov 2022

- Reached 90% accuracy in real-time exercise posture tracking through joint detection using Mediapipe and OpenCV.
- Increased user engagement by 35% through integration of chatbot, meal planner, and BMI calculator

Leadership & Achievements

Bombardier & TCS Aerospace Hackathon - Finalist

Mar 2025

Team Lead

Concordia University

- Led a top 5 finalist team out of 60+ at the Bombardier & TCS Hackathon by presenting EcogenAI, an AI-powered aircraft maintenance system using computer vision, generative audio analysis, and LLM-based insights.

ULTRON 5.0 Hackathon Winner

Nov 2022

Team Lead

SRM Institute of Science and Technology

- Won 1st place in an inter-college hackathon with 20+ competing teams by building a real-time gym-tracking app with 90% posture accuracy and interactive wellness tools.
