Education

Concordia University

Master of Applied Computer Science - GPA: 3.49/4.3

Sep 2023 – Jun 2025

Montreal, Quebec

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science - GPA: 4.01/4.3

Jun 2019 – May 2023

Chennai, India

Technical Skills

AI/ML: TensorFlow, PyTorch, Hugging Face Transformers, Scikit-learn, NLTK, OpenCV, GANs, LangChain, Mediapipe, ChromaDB, **LLMs (Generative AI, RAG)**, Pandas, NumPy
Programming: Python, C++, Java, SQL, Bash, JavaScript, HTML/CSS
MLOps & Deployment: Docker, GCP, Firebase, FastAPI, Flask, Django, Streamlit, CI/CD, Ollama, MLflow
Developer Tools: Git, Linux, VS Code, Jupyter Notebook, Postman, Agile, Matplotlib, Seaborn

Experience

Asterbyte Software Systems

Oct 2020 – May 2023

Machine Learning Consultant - Part Time

Kerala, India

- Implemented emotion transfer in video content using **Neural Emotion Director**, achieving realistic facial expressions while preserving original audio.
- Improved personality trait detection by fine-tuning **Hugging Face T5 model** on audio datasets, boosting classification accuracy by **15%**.
- Reduced dataset preparation time by **60%** through automated facial image generation using **MEL scripting** in Maya.
- Enabled real-time music note prediction by deploying a classification model on **GCP**, reducing latency by **30%** and enabling 24/7 inference in production.
- Generated 10+ AI-based album cover samples using **GANs** trained on song lyrics, identified dataset and model tuning gaps, providing insights for improving visual relevance in future iterations.
- Streamlined document processing by scripting an automated parser using **python-docx** and **AJAX**, reducing manual QA entry time by **70%**.
- Accelerated backend data workflows by optimizing **API and data pipelines**, reducing load times by **25%**, enhancing user experience, and ensuring scalability for production deployment.

Projects

EcoGenAI - Aircraft Predictive Maintenance | OpenCV, LLM, GANs | [Live Demo](#)

Mar 2025

- Implemented early fault detection in aircraft components by combining **OpenCV** and **GANs**, improving fuselage and engine safety monitoring.
- Developed an **LLM-driven** chatbot with **95%** query response relevance, enabling maintenance engineers faster, more intuitive access to predictive maintenance logs.
- Presented to Bombardier and TCS, securing **Top 5 finalist** placement among 60+ hackathon teams.

TrainERAI - Live Gym Tracker | Mediapipe, OpenCV, Firebase | [Live Demo](#)

Nov 2022

- Achieved **90%** accuracy in real-time posture detection by implementing joint tracking with **Mediapipe** and **OpenCV**.
- Enhanced user engagement by **35%** through integration of a chatbot, meal planner, and BMI calculator within the fitness tracking system.

Leadership & Achievements

Bombardier & TCS Aerospace Hackathon - Top 5 Finalist | Team Lead

Mar 2025

- Led a **Top 5 finalist** team among 60+ by presenting **EcoGenAI**, an AI-powered aircraft maintenance system leveraging **computer vision**, **generative audio analysis**, and **LLM-based insights**.

ULTRON 5.0 Hackathon - 1st Place Winner | Team Lead

Nov 2022

- Secured **1st place** among 20+ teams by developing a real-time gym-tracking app with **90% posture accuracy** and integrated wellness tools.
